

Ways to Donate

Sundance for Our Soldiers (SOS) provides services focused on the mental health and wellbeing of humans using horses as a therapy tool. Horses are the largest biofeedback machine and with their innate ability to read and mirror their environment gives humans the opportunity to experience self-discovery. Participants learn hands-on in-the-moment of their strengths and weaknesses, while at the same time learning new problem-solving strategies. Each week the participant learns something new about themselves that will build on their character attributes.

With your donation all proceeds will go directly to supporting services for veterans and horse care for these large four-legged therapists. Horses absorb people's stress, so it is important that we help them relieve their stress by providing them a happy relaxed home environment. With your financial support we can give these veterans and therapy horses the extra nurturing they need.
